Brief History

First automotive production starts in Turkey under license agreements in a heavily protected domestic economy.

Turkey takes first steps to liberalize its economy and integrate with the rest of the world.

Customs Union is signed with the EU in 1996. Exports start to increase. Incentives are introduced for production in Turkey.

Turkey becomes a major hub in automotive production and moves up the value chain, from an assembly center to full product development and manufacturing with focus on R&D.

Turkey is the 17th largest auto manufacturing hub in the world and 6th largest among European countries.

EBITDA and EBITDA Margin

Profitability rise post 2015 explained:

- Strong volumes with new products
- Favorable domestic sales mix
- Pricing focus to offset the weak and volatile TL
- Higher capacity utilization
- Cost reduction actions

2010-2014 margin decline explained:

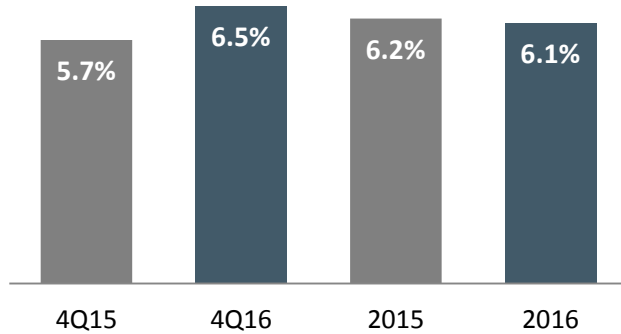

- Changing business mix
- Highly competitive pricing landscape
- Industry shift towards PC = Less favorable sales mix
- Aged product portfolio
- TL volatility causing higher import costs and financial expenses
