Board communiqué Serial: VIII No: 54

### To İstanbul Stock Exchange Chairmanship

**Special Case Announcement :** Explanation about the news in the media

We would like to make the explanation below about today's news on recalls of Ford Transit Connect.

In order to reduce the risk of potential injury when the seat belts are unfastened, US Regulatory Authority suggested to change the Transit Connect's plastic pins used for vehicles' ceiling covering.

No customer complaints or reports have been received about this subject. The replacement demand is solely valid for the USA and not for other markets (including Canada and Europe).

The notified change has been effective both at Kocaeli plant production and in all stocks since June. Vehicle owners in the USA will be notified and the headliner pushpin replacements will be made free of charge by dealers in the USA. The cost of the operation is limited to the cost of plastic pins. Hence, this will not result in a significant expense.

Ford Otosan's export operations shall not be affected. Production and deliveries will continue as planned.

We affirm that the disclosure above is in accordance with the provisions of the Capital Market Board communiqué Serial: VIII No: 54, it reflects all the information we collect about the subject, and this information is consistent with our records and documents. We spend utmost efforts in order to obtain complete and correct information about the subject and claim full responsibility for these disclosures.
